VISION ACADEMY ATLETICO DE MADRID DUBLIN

May 2025

Vision Academy Atletico de Madrid Dublin

Vision

In our ATM DUBLIN Academy we aspire to be an **educational** and **formative** football club of reference, we would like to be recognized throughout Ireland for our commitment to the integral development of young players.

Principles of our vision

Speaking of football development in young players, for the **last 3 seasons (3 years) we have had the tools of the Club Atlético de Madrid methodology**, which provides our coaches with the following knowledge to be able to apply it on the field:

- Our **coaches have learning experiences** in the facilities of Club Atlético de Madrid (WANDA ALCALÁ DE HENARES).
- Table of **objectives to work on each month**.
- **Meetings with Goalkeeping Department**.
- **Meetings with the Physical Preparation Department**.
- **Individual attendance and feedback** with the coordinator of ATM academy in Dublin.

Vision Academy Atletico de Madrid Dublin

What do we expect from our players?

- Fun above all else, it is proven that learning is meaningful if the young player is happy and content.
- Promote values above the result.
- Teamwork, understanding that football is a group sport, not an individual one.
- Effort, discipline, commitment to the team, ability to ask the coach how to improve.
- Young players who are daring and courageous in training and matches.
- Young players who apply in the games the concepts that their coach has proposed to them throughout the week.

Future projection

We want to move forward with the help and support of Club Atlético de Madrid and establish ourselves in the city of Dublin as an academy with a training aspect and a fun space, where our young players enjoy the sport of football. In the coming years, our goal is to grow in players, expand the teams and look for new sports facilities, but we recognize that in this aspect we have a great challenge to achieve.

**Thank you for entrusting football training
to us.**
